Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Species I: Claims 1-3, 16-20;

Species II: Claims 1,2, 4,16-20;

Species III: Claims 1, 2, 5,16-20;

Species IV: Claims 1, 2,6,16-20;

Species V: Claims 1,2,7,8,16-20;

Species VI: Claims 1,2,9,10,11,16-20;

Species VII: Claims 1,2,12,13,16-20;

Species VIII: Claims 1,2,14,16-20;

Species IX: Claims 1,15,16-20.

The species are independent or distinct because the **Species I** requires that the inorganic thin film layer comprising one or more metals selected from A group, or compound selected from one or more of chalcogenides, or nitrides. On the other hand, **Species II** requires that the inorganic thin film layer comprising two or more selected from oxides, oxynitrides, carbides, and nitrides of In, Sn, Ga, Si, Al, Ta, Ti, Ge, Zn, Cd and Mg. On the other hand, **Species III** requires that the inorganic thin film layer is made mainly of at least one of oxide of In, Si and Ga. On the other hand, **Species IV** requires that the inorganic thin film layer made mainly of $(\text{Si}_{1-x}\text{Ge}_x)\text{O}_y$. On the other hand, the **Species V** requires that the inorganic thin film layer comprises two or more of the metals or

compounds selected from B group. On the other hand, the **Species VI** requires that the inorganic thin film layer having metals comprising one or more metal selected from A group; and one or more metal selected from B. On the other hand, the **Species VII** requires that the inorganic thin layer having metals comprising one or more metal selected from C group. On the other hand, the **Species VIII** requires that the inorganic thin layer having metals comprising one or more metal selected from A group; and one or more metal selected from C. On the other hand, the **Species IX** requires that the inorganic thin film layer is made mainly of at least one oxide selected from oxides of C group.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claims is finally held to be allowable. Currently, claims 1-2 are generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is or claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. 1.141. If claims are added after the selection, applicant must indicate which are readable upon the elected species. M.P.E.P. 809.02(a). Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of

record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filled petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
